

PROBABILITY ASSIGNMENT

MOHAMMAD IMRAN

December 29, 2022

1 problem

Let A and B be independent events with $P(A) = 0.3$ and $P(B) = 0.4$ find

1. $P(AB)$
2. $P(A + B)$
3. $P(A|B)$
4. $P(B|A)$

2 solution

Since A and B are independent events, we have

$$P(AB) = P(A)P(B)$$

$$1. P(AB) = 0.3 \times 0.4$$

$$P(AB) = 0.12$$

$$2. P(A + B) = P(A) + P(B) - P(AB)$$

$$P(A + B) = 0.3 + 0.4 - 0.12 = 0.58$$

$$3. P(A|B) = \frac{0.12}{0.40} = 0.3$$

$$4. P(B|A) = \frac{P(B + A)}{P(A)} = \frac{0.12}{0.30} = 0.4$$
